

Eastbound from Phoenix, I saw some mines.

Must be copper mines.

I landed near sunset for fuel and decided to stay overnight in Fort Stockton, Texas. They gave me the Jeep Cherokee on the left to drive to town so I could get a motel. This was shot the next morning. It was 25 degrees out then. Thankfully, 27V was in a hangar overnight.

There's N6827V stuffed in the back of the hangar. It is the red and white one. N5807T is in front of it.

Big hangar. Lots of Mooneys. One Lancair Columbia 400 behind 27V's left wing.

07T parked on All American Aircraft's ramp in San Antonio.

An airliner landing on 12R

We flew to Kerrville. This is the Mooney factory.

That's the Mooney logo on the building.

Vince from All American Aircraft flew with me and gave me 100 pointers along the way.

What have I done?

07T's in **much** better shape than I am.

We are home in Corona.
